## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Volpi (US 6,470,933).

Regarding claim 1: Volpi discloses the tire pressure measuring device with electric power generator for powering the electronics comprising the microprocessor (62) connected to the tire pressure measuring unit (46, 48) for processing and obtaining tire pressure data, a transmitter (64) for transmitting the tire data to the dashboard display; and power is derived from the electric current generator including permanent magnets and induction coil for generating an induced electromotive force through rotation of the wheel and provide power to the microprocessor and electronic unit (col. 6, line 55 – col. 7, line 67; col. 11, line 1-42; Figs. 1-6). Although Volpi does not disclose the transceiver; however, transceiver are well known and used in the art of wireless communication.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "wherein a thermometer" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "wherein a gradienter" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Adamson et al. (US 6,725,713), Adamson et al. (US 6,847,126), Volpi (US 6,885,111), Merz (US 4,163,208), and Monson (US 6,304,610) are cited to show a variety of tire measuring systems with automatic power generator.
